

Getting Up and Running with Your Inseego MiFi X PRO

The Inseego MiFi X PRO (**SFL Mobile Hotspot**) has been activated and tested, by SFL Broadband staff, prior to being shipped. By following the instructions below, you should be able to easily prepare, and connect to, the hotspot to begin accessing the internet for educational purposes. Up to 32 Wi-Fi capable devices (depending on usage) can be connected to the SFL mobile hotspot at one time. The user of each wireless computing device that will be connecting to the hotspot will need to be provided with the device name and password. Keep in mind that the more devices that connect to the device, the more the 100 GB monthly high-speed access will be consumed. (NOTE: This is a one-time set-up process; the computing device(s) may recognize the hotspot in the future and automatically connect to it.)

Your SFL Mobile Hotspot Feature

****Keep the original device box for future returns/exchanges***

Before You Start

1. Charge the Battery

- Insert the USB cable into the charging adapter.
- Insert the small end of the USB cable into the charger/USB port at the top of the device.
- Plug the charging adapter into a standard AC power outlet.

2. Get Ready

- Make sure you are in an area covered by the T-Mobile network (not roaming). Check your location on the T-Mobile coverage map:

<https://www.t-mobile.com/coverage/coverage-map>

- b. Make sure the computing device you are trying to connect to your SFL mobile hotspot has its Wi-Fi (wireless network connection) mode turned on.

3. Power Up Your Hotspot

- a. Press the Power key on the front of the device to turn it on.
 - i. The device will automatically activate

Note: It can take several minutes for your device to connect to the T-Mobile network.

- b. When the hotspot is powered on, the following icons may be displayed on the touchscreen

Get Connected

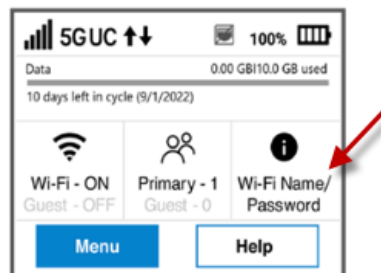

Status indicators

	Home
	Network Signal Strength
	Data transferring between mobile network and MiFi
	Unread messages
	MiFi Wi-Fi network
	Connected devices
	USB tethered
	Battery fully charged
	Battery critically low and MiFi will shut down unless charged
	MiFi connected to an AC charger and charging
	MiFi connected via USB and charging
	MiFi in Battery Preservation Mode
	Ethernet port enabled
	Ethernet port disabled

1. Access Your Wi-Fi Name and Password

The default Wi-Fi name and password (key) can be found on the SFL mobile hotspot display.

- a. To access your Wi-Fi name and password on the display, tap the icon on the screen.

2. Connect to Your SFL Mobile Hotspot

With your Wi-Fi name and password ready, you can now connect your Wi-Fi enabled computing device(s) to the SFL mobile hotspot.

- a. Open the Wi-Fi application or controls on the computer or Wi-Fi enabled computing device that you want to connect to the SFL mobile hotspot and find the Wi-Fi name.
- b. When prompted, enter your Wi-Fi password.
- c. Your Wi-Fi enabled device is now connected to the internet.

Once connected, you are ready to access the internet!

REMINDER: This hotspot is the property of SFL Broadband, a service offering of The Source for Learning, and is being loaned to you in support of this educational initiative.
